## YOUR PC UPGRADED!

DESKTOP AS A SERVICE, OR DAAS, IS A CLOUD COMPUTING OFFERING THAT SECURELY DELIVERS VIRTUAL APPS AND DESKTOPS FROM THE CLOUD TO ANY DEVICE.

## IMAGINE THIS SCENARIO

YOUR COMPANY NEEDS HIGH END COMPUTATION BUT DOESN'T HAVE ENOUGH RESOURCES?

Your daily workload is manageable but their are few renderings, simulations, processing requirement that you meet not everyday but often. Buying 100s of thousands of worth of equipment, that is gonna get outdated in a year, doesn't seem like a good strategy. What if you could rent that environment according to your usage, without that hassle of shifting hardware?

YOU NEED AN UPGRADED PC FOR RESEARCH, BUT FOR FEW MONTHS ONLY? DAAS IS PERFECT FOR YOU
